| <b>Display:</b> | Curriculum Display   |
| <b>Head:</b>    | TBD  |
| <b>Title</b>    | Computer Science Courses<br>This Display will take the reader through the course and give a general understanding of what it's like as a CIS student |

**Progress:**

To this date, CIS has come up with a list of personal to email for prize sponsorships, volunteer list, and we also have our atrium design idea below:

The Computing and Information Science display will house two TV's both will have an interactive tree on them. One will be attached to a Camera that takes photos of QR codes or similar that would record the number of a booth. The booth would then get a point and move accordingly on the tree. The second tree would be for visitors of Open House it would involve a person behind a computer typing in the visitors name and then move the tree according to there.

In addition, many senior project classes and research groups will be submitting displays in the coming weeks.
